

NextGen E-Commerce Platform - Architecture & BRD

1. Project Overview

This document outlines the cloud architecture for the 'Project Phoenix' e-commerce initiative. The project lead is Sarah Jenkins (VP Engineering) and the technical architect is Michael Chen.

2. AWS Infrastructure Details

Primary AWS Account: 123456789012

Target Region: us-east-1

Order Processor ARN: arn:aws:lambda:us-east-1:123456789012:function:OrderProcessor-Production

Customer Data Bucket: s3://cust-data-prod-998

3. Network Architecture

VPC ID: vpc-0a1b2c3d4e5f6g7h8

Public Subnet: subnet-04f1e2d3c4b5a69

Database IP (Internal): 10.0.5.42

Gateway IP: 192.168.1.1

4. Data Handling & PII

For testing purposes, the following customer profiles should be used: Jane Doe (jane.doe@example.com) and Robert Wilson (robert.wilson@corporate.net).

5. Legal & Service Accounts

Master Service Agreement: MSA-2026-PHOENIX-001

Deployment Service Account: svc-deployer-phoenix-prod

Internal API Secret ID: SECRET_TOKEN_9921_X

Legacy Mainframe ID: MF-HOST-001-A

Please ensure that the contract MSA-2026-PHOENIX-001 is referenced in all communications with the vendor. The service account svc-deployer-phoenix-prod should have minimal permissions.
